

Project Development Programme (PDP) Sub-Saharan Africa

1st German Biogas Training Day

13 July 2016, Southern Sun Mayfair Hotel, Nairobi, Kenya

German Biogas Training Day 2016

On the 11th of July 2016, the “energy solutions – made in Germany” initiative implemented by the Project Development Programme will facilitate a technical training programme conducted by reputable German engineering experts in the context of the 1st German Biogas Training Day (GBTD) in Nairobi, Kenya.

The GBTD 2016 takes place as part of the 1st Biogas Africa Forum (http://icesn.com/biogas_africa2016/) and contents include **basics of biogas systems** as well as **safety and quality criteria in biogas project development**. Participants gain the following benefits by attending the GBTD:

- Building capacity in technical aspects and related business skills
- Identifying new business partnerships with veteran German companies
- Strengthening existing partnerships with German experts

Participants can attend the whole training day for a participation charge of USD 100. The contents of the respective sessions are explained in the [Biogas Africa Forum 2016 programme](#).

Facilitator:

Trainers

The trainings will be conducted by representatives from the Snow Leopard Projects GmbH, a reputable German project developer with an impressive track record in international biogas projects and engineering partner of Kenya's biggest anaerobic digestion plant at Gorge Farm, Lake Naivasha and the German Biogas Association (FvB). Cooperation partners are the Nairobi based Strathmore University and the Kenya Industrial Research and Development Institute (KIRDI).

Target Groups of Participants

The sessions have a distinct focus on technical capabilities and aim on bringing benefit to the...

... *managing level of:*

- biogas companies,
- energy service providers,
- farms and processing facilities for agricultural products,
- banks and equity investors.

... *engineers and technical staff of:*

- biogas companies,
- energy service providers,
- distribution utilities,
- regulatory authorities and policymakers.

General background

The biogas market is growing in Kenya with the government making efforts to put strategic policies and regulations in place, aiming at fostering the use of biogas. The biogas industry experiences a growing demand for commercial and industrial segments. German companies have gained broad experience in developing and applying biogas technologies and engineering services adapted to the Kenyan market.

Key to expansion of these technologies and services in the Kenyan biogas market is the capacity building amongst – and establishment of business partnerships with local biogas and power generation companies as well as with the public sector. The German Biogas Training Day, organized within the framework of the “energy solutions – made in Germany” initiative, aims at facilitating new business partnerships and strengthen existing connections.

Registration form

German Biogas Training Day 2016

13 July 2016

Deadline for registration: 27 June 2016

Participant (Participation is limited to 2 representatives per company. The organisers reserve the right of rejecting participants in case of overbooked sessions.)

Surname of participant

Name of participant

Position / function of participant

Phone

Email

I wish to participate in the German Biogas Training Day featuring topics of Biogas Basics as well as Safety and Quality Criteria in Biogas Development on Wednesday the 13 July 2016 from 09:00 a.m. to 6:00 p.m.)

Company Details

Name of company / organisation

Website of company

Year of foundation

Fields of operation:

- Anaerobic digestion Fermentation CHP Combustion Bio-fuels
 Agricultural waste Municipal waste Manure Plant material
 Sewage Green waste Food waste

Products/ Services:

- Project Developer Wholesaler Installation / Construction Financing
 Service Provider / Consulting

Annual installed biogas capacity in 2015

Overall installed biogas capacity (proven track record)

* Turnover in 2015 in USD:

- <20,000 USD <50,000 <200,000 <1 Mio >1 Mio USD

* Number of employees (full-time equivalent)

* *Voluntary fields*
